

Seasonal Changes

Weather

Weather is a description of what the conditions are like in a place.

It could be:

- hot or cold,
- wet or dry,
- windy or calm.

Investigation Questions

- Autumn: Do trees with bigger leaves lose their leaves first in Autumn?
- Spring: Are there plants that flower in every season? What are they?
- Summer: Which plants do we expect to flower this season?

Weather in Each Season

Spring

- rainy
- becomes warmer

Summer

- warmest
- strong sun

Autumn

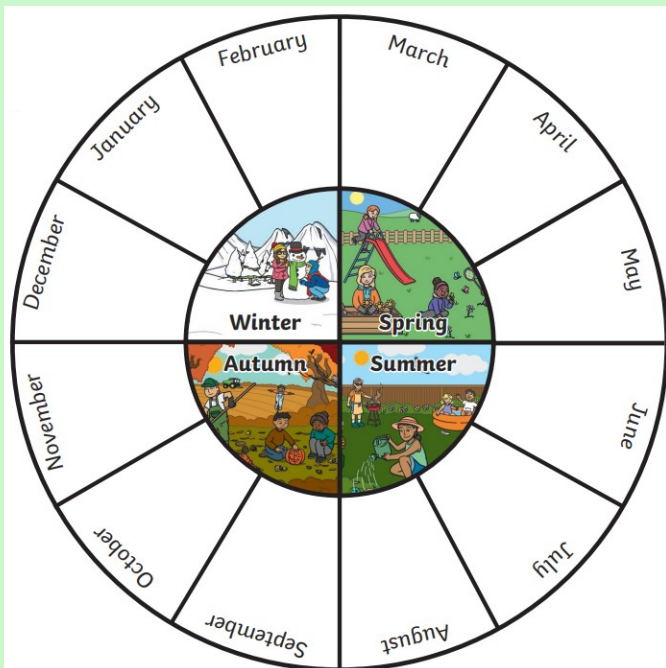

- chillier
- windier

Winter

- coldest
- snow

Seasons and the Months of the Year

Daylight Hours

Spring

After winter has ended, it begins to stay lighter for longer. In spring, the evenings are lighter than in winter.

Summer

Summer has more **daylight hours** than any other **season**. It gets lighter much earlier in the morning and stays lighter later into the evening.

Autumn

It stays darker a little longer in the morning in autumn and begins to get darker earlier in the evening.

Winter

Winter has the least amount of **daylight hours**. It is darker for longer in the morning and gets darker earlier in the day.
