

Plants

Plants are living things. They can be found all around our world, in lots of different shapes, sizes, colours and textures. Plants can be grouped in lots of different ways depending on where they grow and how they grow.

Key Vocabulary

Word	Definition
tree	A type of plant that usually has a trunk and can grow very tall.
deciduous	Deciduous trees lose their leaves during the autumn and winter.
evergreen	Evergreen trees keep their green leaves or needles all year round, even in the winter.
wild plants	A wild plant seed grows where it falls. It doesn't need to be cared for.
garden plants	A garden plant is grown and cared for by a person in their garden.
