

Vocabulary

photograph	an image taken by a camera
device	something like a computer, tablet or phone that we use to do things
edit	to change an image
brightness	how light or dark a photo is
cropping	making a photo smaller

We can use different tools to edit a photo:

- Change the brightness.
- Crop the photo. →
- Make colours stronger or weaker.

Different light sources and different amounts of light can change how bright or dark a photo looks.

daylight

lamp light

flash

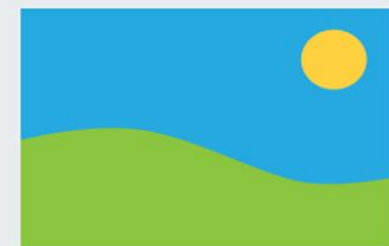

The internet is a **global network**. That means it's like a giant web that connects computers, tablets and phones all around the whole world.

People can send messages, watch videos, play games and share ideas with each other – even if they live very far away.

We can take photographs on many different devices.
